& METATOPIA STUDIO

of metaformative architectures

by REVERSO – Jaime del Val

METABODY is an Institute, Forum and project, directed by Jaime del Val and Reverso association, that counteracts the tendency in media culture to reduce the body to calculable elements, empowering expression and affording control. Metabody reintroduces into digital and physical spaces the richness and ambiguity of bodily movement constituting dynamic, participatory and performative environments for outdoors and indoors, an emergent and indeterminate space, a **METATOPIA**.

A person in a wheelchair is seated inside a large, illuminated, translucent tent structure. The tent is made of a white, fabric-like material and is supported by a network of black poles. The interior is lit with a soft, purple and blue glow, creating a dreamlike atmosphere. The person in the wheelchair is looking towards the right side of the frame. The tent is set up on a dark surface, possibly outdoors at night.

body

***METABODY** es un Instituto, Foro y proyecto dirigidos por Jaime Val y la asociación Reverso, que cuestiona la homogeneización de expresiones inducida por las actuales tecnologías de comunicación y control, y propone reinventarlas poniendo en valor la corporalidad y su diversidad en un nuevo concepto de arquitectura interactiva que se transforma en todos sus aspectos físicos y digitales, constituyendo entornos dinámicos, performativos y participativos para espacios urbanos o en interior, un espacio indeterminado y en devenir, una **METATOPIA**.*
