& METATOPIA STUDIO

of metaformative architectures

METABODY is an Institute, Forum and project, directed by Jaime del Val and Reverso association, that counteracts the tendency in media culture to reduce the body to calculable elements, empowering expression and affording control. Metabody reintroduces into digital and physical spaces the richness and ambiguity of bodily movement constituting dynamic, participatory and performative environments for outdoors and indoors, an emergent and indeterminate space, a **METATOPIA**.

ONTOETHICS INSTITUTE & CONSULTANCY

Ethics of Technology Consultancy & Project Coordination Consultancy

Are you (not) worried by the ethical implications of the technologies you produce or use? Contact us for advice!

The Metabody Institute offers pioneering advice and consultancy on ethics of technology. Jaime del Val, following his expertise as philosopher, media artist and transdisciplinary transnational project coordinator offers consultancy to institutions or individuals about the ethics of technology from a pioneering perspective. The Institute has an extensive board of advisors and collaborators who may help in particular cases too.
