Two years after the outbreak of the pandemic and the distance or hybridity it forced our lives into, the 13th Beyond Humanism Conference is taking place as a live event, returning to one of the crucial places for the development of the several Posthuman routes of thinking, the University of the Aegean, Mytilini, Greece. It was there where in the 2nd BHC in 2010 the *Metahuman Manifesto* was for the first time presented and an emphasis to the Audiovisual was given. It was also there in the 6th BHC in 2014 where the emphasis to the Political was underlined. It's now, after the pandemic and the two online forums (2020 and 2021) plus the hybrid form 1st Methuman Futures Forum in September – October 2022, that we turn to a new, hybrid, but with an emphasis to the live presentations event underlining the need for new reflections and new ideas on the Posthuman.

In face of the ongoing 6th Great Mass Extinction created by anthropogenic action since the last millennia and exponentially accelerating, threatening all life on earth including “humans”, it is urgent to stop our flight forwards, to stop having our foot on the accelerator towards extinction, to stop looking to the side with human supremacy excuses. It is **THE GREATEST EVOLUTIONARY CHALLENGE IN THE HISTORY OF THE EARTH**, as it is the first time that a species of the Planet Unleashes a Mass Extinction: this is THE post/metahuman topic. But little can be done if no powerful voice is heard and critical intellectuals, artists, and even activists keep avoiding the core problems: our toxic sedentary occupation of the earth and overpopulation. The challenge is that **all life on earth needs to be equally taken care of**. This implies acknowledging the way currently dominant human life is entirely grounded on a massive disruption, exploitation and extermination of much of the other 8,7 million species. We occupy at least a half of the earth’s liveable surface mostly with devastating monocrops, which are mostly for the 100 billion sentient beings enslaved in concentration camps called farms, for feeding the cruelty of a superpredator that suicidally drags itself to extinction. **ALL LIFE ON EARTH NEEDS TO BE LIBERATED**
